

*“We enjoy working with Keytech as they share the same commitments and always deliver in a professional, effective and successful way.”*

**Jason Care, Group Systems Manager, Melrose**

Keytech has worked closely with Melrose for several years on a number of different projects. Melrose specialises in the acquisition of underperforming manufacturing businesses to improve performance and return value to shareholders.

When Melrose introduced OneStream as its new Financial Management Consolidation System, we played a significant role in an effective training rollout and implementation.

During a four-week training tour, we carried out classroom training for over 300 users in Singapore, Mainz, Birmingham, Pittsburgh, Raleigh and San Paulo. This was supported by a Melrose portal created and hosted by Keytech for users to view a pre-course E-learning on the Melrose OneStream solution.

In 2016, Melrose acquired Nortek. We needed to respond quickly, and redeveloped and deployed an updated training programme which

required rebuilding the application and updating all supporting training material. Further successful classroom training was delivered to around 100 users in Manchester, San Francisco and Chicago.
